PROFESSIONAL PROFILE

Social Communicator - Journalist, with experience in creating audiovisual communication pieces with knowledge in the implementation of IPTV transmissions.

Preparation and execution of communication projects.

In these more than 15 years of experience I have held positions as camera assistant, cameraman, lighting assistant, microphone operator, live and studio sound engineer. All this experience helped me promote myself as a producer at different levels until I became camera director, production manager and finally director of a university channel in the city of Bogotá. I was lucky to work and at the same time study in this passion for the media.

Today I continue along the paths of technology, in that search to communicate and inform with truthfulness and credibility.
