

Mark Thompson | Photographer | Filmmaker

I am an adventurer from New Zealand, now settled in Sandy, Utah. I'm drawn to the wilderness, exploring, discovering and capturing moments from around the world in both stills and video. My photography is both artistic and journalistic, with a great body of my work a documentary of life on earth. Mixing composition while always retaining the authenticity and reality of a moment and preserving it with precision and detail.

In order to best achieve this, there is a mixture of artist and tools fit for the job. I use the Hasselblad H6D-100c with its 100MP sensor and lenses that can resolve the highest detail perfectly. I print my work on Hahnemühle fine art cotton rag which has become my preferred medium. Creating fine art work with a luxurious texture, clarity and color depth that carry the precision and detail of the Hasselblad images perfectly. Reproducing moments in time in large prints that opens windows to places we dream of, places that inspire and images that simply bring delight.

Behind the scenes I also record video, acting as a DP for a number of clients or working on my own film projects. I have followed festivals and events and I am currently moving toward documentary film making along with our personal story of life through the time of covid 19.

I arrived in the USA during the pandemic and while I was here, met Teresa. We enjoyed life in the same way and soon realized that we wanted to be together. We had a small wedding in Sedona and I began the immigration process. Our journey has been courageous and inspiring. An adventure that neither of us could have dreamed and one that has impacted hundreds of people around us.

My work is truly a piece of art, from the moment I take a photo to any post editing that I carry out. I invested in a pair of wide format giclee printers, allowing me to control the quality and presentation of each individual image. I mount and frame each piece personally using techniques and materials that come together to produce stunning pieces of art.

Feel free to contact me anytime.
