

SARIAH MAY

art department

OVERVIEW

Since stepping into the film industry in 2017, I've had the opportunity to work in various roles throughout the art department for film, television, and commercial work. I thrive in an environment where I get to work with many different people and departments, and requires creative problem solving. I have a passion for creating and curating interesting and unique things / spaces, and excel at taking a director or client's vision and bringing it forth into the world.
