

# BRADLEY CRANE

DIGITAL IMAGING TECHNICIAN

AUGUST  
2015

## PERSONAL STATEMENT

One part digital alchemist, two parts computer nerd. Experienced D.I.T. seeks challenging opportunities and money. Organized, driven, and surprisingly capable of human interaction despite said computer skills. Did I mention I like money? You should hire me.

## MY PROCESS

Data is always written to at least 3 locations. All transfers are MD5 verified. I have an absurd amount of redundancies and data safety built into my system and workflow. Parody drives, redundant raid controllers/coolers, uninterruptible power supplies, off-site vault storage, LTO tape, and so on. Your data is safe with me.

I own a van and generator to prevent me from holding up camera trucks or set generators when I am dropping the last few cards after wrap.

I create beautiful dailies, build great LUT workflows, and know my way around all major camera systems.
