## SUMMARY

I am detail oriented, laser focused, and complete projects with time to spare. Having worked professionally in commercial & TV production, as well years of experience in post production, allows me to understand and streamline the entire process, solve problems before they become problems, and deliver an amazing finished product.

I am a self-motivated problem solver, and am able to wrap my head around multiple different projects at once. I communicate well, am kind and easy to get along with, and take great pride in the work I do.

When I'm not working, I can be found spending time with my amazing wife, our 2 beautiful kids & crazy husky. I love to travel, cook, play volleyball, and obsess (a little) over the Utah Jazz.
